

ENVIRONMENTAL POLICY

Sebden Steel Service Centres is the largest privately owned, mill-independent steel processor and stockholder of strip mill and reversing mill plate products in the UK & Ireland.

We consider respect for the environment to be an essential part of good business practice, and as such we are committed to achieving and maintaining a high standard of environmental performance in our business.

As part of this commitment, we have established an Environmental Management System (EMS) that:

- Supports the setting of environmental objectives, such as recycling, waste and resource efficiency.
- Ensures that all applicable requirements (including regulatory) are known and understood by relevant employees.
- Facilitates environmental protection (including prevention of pollution) through training and otherwise promoting employee and management awareness, the provision of recycling facilities and the adoption of relevant technological developments.
- Enables us to effectively implement improvements to our environmental performance as part of regular Management Reviews.
- Communicates our policy to our employees and interested parties.

Our Environmental Policy will be regularly reviewed to ensure its ongoing suitability and its appropriateness to the purpose and context of our organisation.

Signed:

A handwritten signature in black ink, appearing to read "Mark McCausland", written over a faint circular stamp.

Dated: 26.02.2025
